PROFESSIONAL SUMMARY

Data Engineer with 5+ years of experience blending scalable data architecture with robust software engineering practices. Expert in Python, Apache Airflow, and GCP (BigQuery), currently managing 200+ automated ETL/ELT pipelines processing over 20M rows daily. Proven track record of driving impact in multinational environments by optimizing cloud performance, implementing strict CI/CD workflows, and translating complex business requirements into reliable data products. C1-Advanced English speaker, adept at cross-functional communication and leveraging AI-driven automation to accelerate delivery.

TECHNICAL SKILLS

- **Languages:** Python, SQL, Bash.
- **Cloud & Data Warehousing:** Google Cloud Platform (GCP), Google BigQuery, Snowflake, PostgreSQL.
- **Data Engineering & Orchestration:** Apache Airflow, dbt, ELT/ETL, Pandas, Avro.
- **DevOps & Infrastructure:** Docker, Kubernetes, Terraform, CI/CD, GitHub Actions, Jenkins.
- **Backend, Automation & APIs:** FastAPI, Django, Flask, n8n, REST APIs, GraphQL, Microservices.
- **Practices & Methodologies:** Data Governance, Data Modeling, Agile/Scrum, Git, Code Reviews.

PROFESSIONAL EXPERIENCE

Python Engineer / Data Engineer

Amadeus

Jul 2022 - Present
Medellín, Colombia

- **Architected and currently maintain 219 scalable ETL/ELT pipelines** using Python and Apache Airflow, processing over 20 million rows daily from diverse sources into Google BigQuery.
- **Slashed data loading times from several minutes to just 10 seconds** for 1M+ record datasets by re-architecting row-by-row inserts into GCS-to-BigQuery bulk loads using AVRO file transformations.
- **Automated reporting workflows for analytics, billing teams, and external clients**, replacing a manual ticketing system with automated data ingestion via APIs, emails, and flat files, saving hundreds of hours across departments.
- **Achieved a zero human-error rate in data validation** by developing custom Pandas-based scripts to automate quality checks, profiling, and reconciliation before downstream consumption.
- **Accelerated production deployment times from 2 days to a single afternoon** by implementing CI/CD pipelines for Terraform and Docker on GCP, and integrating AI (GitHub Copilot) to streamline PR reviews and code verification.

Senior Application Analyst / Software Engineer

Emtelco

Jul 2020 - Mar 2022
Medellín, Colombia

- Led the technical migration from a monolithic architecture to microservices, improving scalability and system resilience.
- Designed and implemented backend services using Python (Django).
- Optimized PostgreSQL queries, improving performance for high-traffic workloads.
- Participated in architectural decision-making and guided engineering standards across services.

- Collaborated closely with cross-functional teams in an Agile (Scrum/Kanban) environment.

Python Backend Developer

Globant

Mar 2022 - May 2022

Medellín, Colombia

- Developed backend systems using Django, Docker, and PostgreSQL.
- Applied clean architecture principles and testing practices.
- Contributed to CI/CD workflows and cloud deployments.

Cybersecurity Developer

Bancolombia

Jan 2019 - Jul 2019

Medellín, Colombia

- Developed a secure internal application to manage storage media permissions using antivirus APIs.
- Strengthened understanding of data governance, access control, and regulatory compliance.

EDUCATION

Bachelor's Degree in Software Engineering

University of La Rioja - Bogotá, Colombia

LANGUAGES

English: C1-Advanced (Fluent communication with technical & non-technical stakeholders)

Spanish: Native
